Education

B.Tech in Information Technology

2021 - 2025

Shri G.S. Institute of Technology and Science, Indore

Experience

AI Engineer

May 2025 – Present

WeBuildTech

Gurugram

- Built reusable backend APIs using **FastAPI**, enabling modular integration and improving development efficiency across multiple client projects.
- Fine-Tuned Small LLMs which took Natural Language Instructions for Geometric Constructions as Input and returned function calls for a Geometry Engine as Output.
- Integrated **Generative AI features** powered by **Anthropic, OpenAI, Gemini, and Grok**, aligning with dynamic client requirements.
- Designed pipelines for **automated educational content generation**, including **HTML widgets, SVG diagrams**, natural language text, and AI-generated images.
- Collaborated with cross-functional teams to prototype and integrate **LLM-powered features** into production systems with scalable, clean code architecture.

Projects

AskPDF

GitHub

- Developed an **AI-powered PDF analysis tool** that enables users to ask questions and receive accurate answers based on large PDF documents.
- Utilized **Mistral AI's LLM** for high-accuracy text processing, supporting documents up to **500+ pages**.
- Applied **HuggingFaceEmbeddings** to generate word embeddings, achieving **90%+ query matching accuracy**.
- Implemented **FAISS** to construct a vector database, facilitating efficient searches across extensive text datasets.
- Developed an intuitive UI with **Streamlit**, reducing query response times by **30%**.

Lora - Your own therapist

GitHub; HuggingFace

- Fine-tuned Meta's LLaMA 2 on a curated dataset (`kunalchamoli/mental_health_v1`) containing therapy session conversations.
- Implemented supervised fine-tuning using Hugging Face's **transformers** and **PEFT** libraries to adapt the model for mental health therapy, leveraging a specialized dataset of therapy sessions and a couple of System Prompts to create a compassionate and empathetic conversational agent.
- Loaded the base model in 4-bit precision using **bitsandbytes** to reduce memory usage and optimize training on limited hardware.
- Using **LoRA** (Low Rank Adaptation) to efficiently update limited parameters in Fine Tuning Process.

Skills

Languages	Python, SQL
Libraries and Frameworks	FastAPI, Flask, PyTorch, TensorFlow, HuggingFace Transformers, PEFT
Soft Skills	Communication, Problem Solving, Time Management, Work Ethic
Tools and Operating Systems	Windows, MacOS, VSCode, MS Office
Certifications	How Transformer LLMs Work (DeepLearning AI), Machine Learning A-Z (Udemy)

Achievements

- Solved 200+ DSA Problems:** Demonstrated proficiency in Data Structures and Algorithms(Problem Solving) by solving over 200 problems across various coding platforms.
- 100 Days Coding Badge on LeetCode:** Earned the 100 Days Coding Badge, demonstrating strong coding skills and commitment to consistent practice.
- Top 4 Percentile in JEE Main 2021 and Qualified JEE Advanced:** Ranked among the top 4% out of 1.2 million candidates in one of India's most competitive exams.
- As **Head of External Affairs at E-Cell SGSITS**, lead the **Sponsorship Team** in successfully securing **UpGrad** as the Title Sponsor for our annual flagship event **E-Summit 2024**
